

Chris REDFERN

Head of Manufacturing, ZEROe Aircraft and Head of Propulsion Industrial Architects
AIRBUS

Chris joined Airbus nearly five years ago as the head of the propulsion industrial architects team, a role which requires the development and implementation of manufacturing technologies and end to end solutions to ensure next level industrial competitiveness for future aircraft developments.

Three years ago Chris took on the additional responsibility as Head of Manufacturing for ZEROe where he leads a diverse team of manufacturing engineers to develop the processes, technologies and aircraft co-design needed to secure internal and external serial production maturity before the end of the decade.

Chris brings to ZEROe his experience from various senior positions with Rolls-Royce, Safran and now Airbus. He has broad lifecycle knowledge gained from global roles across jet engine design, manufacturing operations, manufacturing engineering, MRO as well as joint-ventures and airline operations.
